Discussion on Educational Rights of Minorities under Article 29 & 30 of the Constitution of India

(10th May 2017 at Constitutional Club of India, New Delhi)

One can't lose sight of the fact that we live in a competitive world today, where professional education is in demand. There are large numbers of professionals and other institutions have been established by the minorities.

Now the minorities' educational institutions desire to break free of the unnecessary shackles put on their functioning as modern educational institutions and to impart quality education for the benefits of the community for whom they were established. These institutions also desire that the Government must get off their back, and that they should be allowed to provide quality education uninterrupted by unnecessary rules and regulations.

It has been held by the S.C. in *TA Pai Foundation vs State of Karnataka* (2002) 8 see 481(Para 145) that a minority educational institution is free to admit all students of their own community. In *Pai Foundation case* (Supra) the S.C. also held that unaided professional institutions should be given greater autonomy in determination of admission procedure and Fee Structure.

Reference may, in this connection be made to a clarifactory judgment rendered by seven Judges Bench of Supreme Court in *P.A. Inamdar vs State of Maharashtra* (2005) 6 see 537, where there lordships have held by that " there is nothing wrong in an entrance last being held for one group of institutions imparting same or similar education. Such institutions situated in one state or in more than one state may join together and hold a common entrance test."

Therefore Conference was organized of all managers of the medical colleges established by minorities to discuss various problems of their colleges including constitution of their association for holding a common entrance test for admissions.
